Chirag S Kotian

Full Stack Web3 developer

Experienced in building decentralized applications (dApps) and leveraging blockchain technologies such as Ethereum, Solana, or Polygon. Skilled in smart contract development using Solidity, Rust, and other Web3 languages, with a strong understanding of decentralized finance (DeFi), non-fungible tokens (NFTs), and distributed ledger technology. Familiar with Web3 tools like Truffle, Hardhat, IPFS, and The Graph, and proficient in integrating blockchain solutions with front-end frameworks.
